

ELMORE'S PATENT COPPER-DEPOSITING COMPANY (LIMITED) LTD. APPLICATIOMS for the above ORDER
TO THE MANUFACTURERS OF ELMORE'S WIRE, MANUFACTUR-
ING COMPANY (LIMITED).

THE SUBSCRIPTION LIST WILL OPEN on FRIDAY, the 1st

JULY, and will CLOSE on or before SATURDAY, the 2nd

JULY.

ELMORE'S WIRE MANUFACTURING COMPANY (LIMITED)

INCORPORATED UNDER THE COMPANIES ACT, 1862, to 1896,

whereby the liability of the shareholders is limited to the

amount of their shares.

CAPITAL.—£200,000 divided into 200,000 shares of £1

each, and 10 POUNDS' SHARES OF £1 each.

Applications have been individually received, for a very large pro-

portion of the present issue, and the remaining allotment

will be given to those applicants beyond allotment

of the shares now offered for subscription.

The price of this share is £5 per share, and the premium

will be carried to a reserve fund, the

remaining half is payable to Elmore's Patent Copper Depositing

Company, subject, however, to a minimum of £5 per share on application.

£5 per share on allotment, and a minimum of £2 per share

on the 1st August, and £2 per share on the 1st November.

THE BOARD OF DIRECTORS.

GEORGE SMITH, Esq. (Chairman of the Kent Waterworks Com-

pany and Director of the Central Bank of London, Limited)

WILLIAM ELMORE, Esq. (Barrister, The Strand, Leeds).

MR JOHN H. MOHRS, R.O.S.I., 22 Queen Street,

S.W. Director of the Neuschauf Copper

Company, Limited).

M. J. GASKIN, Esq. (Lloyd's, Sibbald's Hill Park,

Surrey, Director of the Coss Copper Com-

pany Limited).

JOHN H. MOHRS, Esq. (Inventor, Wimble-

don, Surrey, Director of the Elmore Copper

Company Limited).

J. J. ATKINSON, Esq. (Croydon, Surrey, Prior,

Aberthwaite, Lancashire).

J. T. COOK, Esq. (Croydon, Nightingale Lane,

S.W.).

BANKERS.

MARTIN & CO., 61 Lombard Street, E.C.

DERBYSHIRE & CO., Draper's Gardens, E.C.

Secretary (pro tem.)

Mr J. H. MOHRS.

OFFICERS.

W. H. HOLLAND, SONS, COWARD, & HAWKLEY, Minories Lane, E.C.

DELONTE, DEXTER, GRIFFITHS & CO., Leithbury, E.C.

WORKS MANAGERS.

MESSRS E. H. & A. S. ELMORE.

HATCH PARK, near Leeds.

This Company is formed to acquire the exclusive British

manufacture of all kinds of metal wire, ribbon, tape, and rod by

the Elmore process, and to sell the same at a premium for

the same. It is formed pursuant to the original intention of the

licensing company, which was to have a separate company and

capital to carry on the great amount of work the directors

were certain would be offered to the wire manufacturing depart-

ment.

The Company is launched at a favourable time in consequence

of the rapid extension and development now about

to be made in the electrical industry, and by the

establishment of numerous central electric-light

stations in London and throughout the country, and other appli-

cations of electricity which have produced, and must still more

create, an enormous demand for pure copper, wire of the

highest electrical conductivity obtainable.

By the Elmore process, in the one operation of reducing the

copper from the rough Chillicothe copper, in the form of

spikes, from 100 lbs. to 10 lbs., it is automatically

produced, and the gold, silver, and impurities are removed.

The fact of the Elmore wire being drawn direct from the discov-

er's plant without annealing ensures the maximum purity

and consistency of quality, and the maximum conductivity in copper.

Therefore it cannot fail to be highly appreciated by elec-

trical, telephone, and other electrical engineers.

Mr. Clark Forde & Taylor, the well-known experts, who

have carried out extensive experiments on the properties of copper

wire, and have carefully investigated its electrical

and mechanical properties, state in their first report:—“In the

first place, we shall speak of the conducting power of what

is usually called ‘pure’ copper, and of the standard of annealed

copper. This standard is founded on the experiments of Dr

Mulholland, and represents the highest conductivity he ever

obtained, and represents previous publications, and for many years

it was believed to be the standard. The standard for copper

is denoted by 102.

Messrs Clark Forde & Taylor certify that the mean of the conductivity of three samples of

hard copper, in terms of the standard for hard copper, as

well as that of annealed copper, is 102.2.

Conductivity of annealed

wire, in terms of stan-

dard for annealed copper, is 102.3.

Conductivity for hard copper is 104.4.

We draw the larger wire through the thinnest holes, and a draw

plate (the last hole being of square), without annealing, and the

hardest may be judged by the fact that its breaking

point is of only 30 lbs. per square inch, with an

elongation under test of only 3%.

We have been

deeply interested in this wire, as its conducting power is higher

than that of any sample we have hitherto tested. The mechanical

as well as the electrical properties of your copper wire are

excellent.

From the foregoing, it will be seen that the Elmore wire is cap-

able of being drawn through the thinnest holes, and at the same time retaining its extremely high conductivity.

For use in submarine cable construction, it is equally capable, of being very soft.

It is, therefore, intended that the wire produced by this Com-

pany and its licensees will secure the monopoly for the supply of

wire for telegraphic and cable purposes, as it fulfills all the condi-

tions required.

The directors are satisfied that this superiority is of great

value, and that the Elmore wire will become the standard for

electric and general purposes.

The following table illustrates the cost of manufacturing wire by the

Elmore process, and the cost of manufacturing wire by the

Company's proposed output of 100 tons per week, have been pre-

pared by Mr. Wm. Elmore, with the result that the directors feel

assured that this Company will be able to produce copper wire

in cheaper proportions, and of greater electrical conductivity, and malleability

superior to anything of the kind which has ever been produced by

anyone, exclusive of royalities which practically guarantee

the success of this Company are as follows:—

1. That the Elmore wire will be of a decided commanding superiority

over anything in competition with it.

2. The cost of manufacture is far less than that of the best

quality of copper wire hitherto produced.

Elmore's Patent Copper Depositing Company (Limited) have

undertaken to manufacture and supply copper wire, and all the

plant already established in their late works during the erection

of this Company's Works, and to enable this Company to at once

commence operations which to start work immediately on completion

of its plant.

The purchase-money to be paid by the Company to Elmore's

Patent Copper Depositing Company (Limited) is £75,000 and half

that sum will be received by any issue of shares by this

Company, and also the allotment of the ten founders' shares of

£1 each.

The founders' shares will not be entitled to any dividend until

20 years from the date of incorporation, and the ordinary paid-up

capital of the Company in any year, after which the dividends

will be divided, as to one moiety to the holders of the ordinary

shares, and to the other moiety to the holders of the founders'

shares.

No premium money has been or will be paid, and all the preliminary expenses (including brokerage) up to the first allotment

of shares will be paid by Elmore's Patent Copper Depositing Com-

pany.

Application will be made to the London Stock Exchange for

admission and quotation.

The following agreement has been entered into:—An agree-

ment between the parties hereto, quoted herein,

together with specimen articles annexed thereto, to be

executed in duplicate, and to be witnessed by two persons

of good standing, and to be countersigned by the parties

hereto, and to be registered with the Master of the Courts of Common

Law, according to the Statute of Frauds, and to be witnessed by

the Master of the Courts of Common Law, and to be registered
